

## **JS (Part 7)**

## **Practice Questions**

Qs1. Write an arrow function named arrayAverage that accepts an array of numbers and returns the average of those numbers.

Qs2. Write an arrow function named isEven() that takes a single number as argument and returns if it is even or not.

## Qs3. What is the output of the following code:

```
const object = {
    message: 'Hello, World!',

    logMessage() {
        console.log(this.message);
    }
};

setTimeout(object.logMessage, 1000);
```

## Qs4. What is the output of the following code:

```
let length = 4;
function callback() {
   console.log(this.length);
```

```
const object = {
   length: 5,
   method(callback) {
      callback();
   },
};

object.method(callback, 1, 2);
```
